

QUANTUM GROUP
GARDEN ROOMS

GARDEN ROOMS

INTRODUCTION

Quantum Group have developed a range of quality Garden Rooms available to purchase for installation in as little as 6 weeks.

Our design team have carefully refined a high specification to ensure a lasting outbuilding that can stand the test of time and be used all year round.

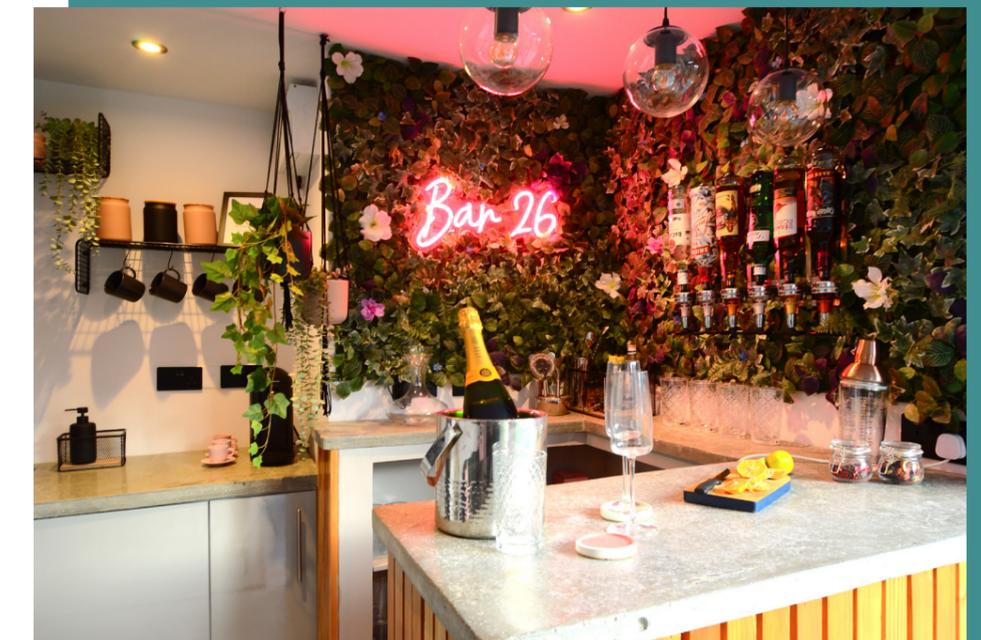

As working from home is becoming increasingly popular, these rooms present a great opportunity to create a home office, home bar, home gym, without the expense or time needed for an extension with all the attached fees.

We have worked hard to ensure our process is as simple as possible for you, from design to installation.

Unlike our competitors, our price includes a fully plaster finished room. We have the ability to completely finish your space, hooking you up to give you light, heating, wifi, plumbing, flooring, even your own custom built bar!

We pride ourselves on the finish and finer details.

Our design team provide a free visualisation service where you can even walk round your new space... keep reading to find out more!

QG BENEFITS

We've paired with **TWO SUPPLIERS** to ensure consistently good, high quality timber and glazing for all of our builds.

Our design team will hold a **PERSONAL CONSULTATION** to make sure every socket, every light goes in the right place for your needs.

We build as much as possible off site to **REDUCE DISRUPTION** to you.

No limitations, your material **YOUR CHOICE**, your size your choice - get the finish you envisioned!

The level of **INSULATION** we provide means year round usable space for years to come.

FREE CONSULTATION and **ADVICE** from our design and build team.

3D IMAGERY and a walk around of your new garden room to check the build fits your requirements for use.

NO SIZE LIMITS or restrictions.

THE DESIGNS

THE ELEGANCE

Option 01

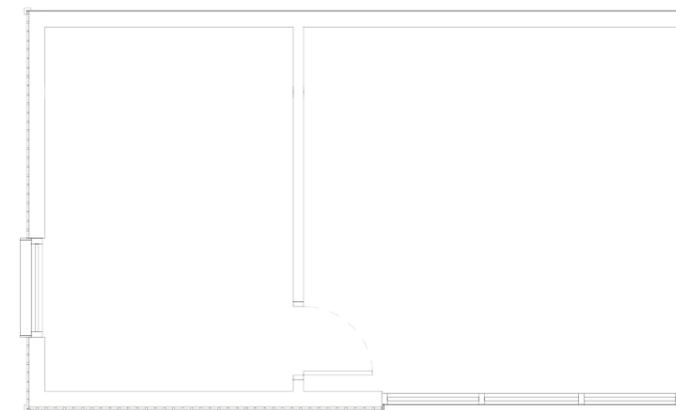

The Elegance Garden House has been designed with simplicity in mind, to ensure your new garden room provides the space you need for your desired use with a simple and elegant style. Function over form.

It includes a set of 3 panel bi-fold doors and one feature window.

The overhang is minimal with lighting fixed onto the facade of the room.

The anthracite black box surrounds are a simple detail to enhance the glazing and break up the cladding.

Designed to suit whichever size you need. This model is our lowest priced design, its clean cut simplicity is a favourite.

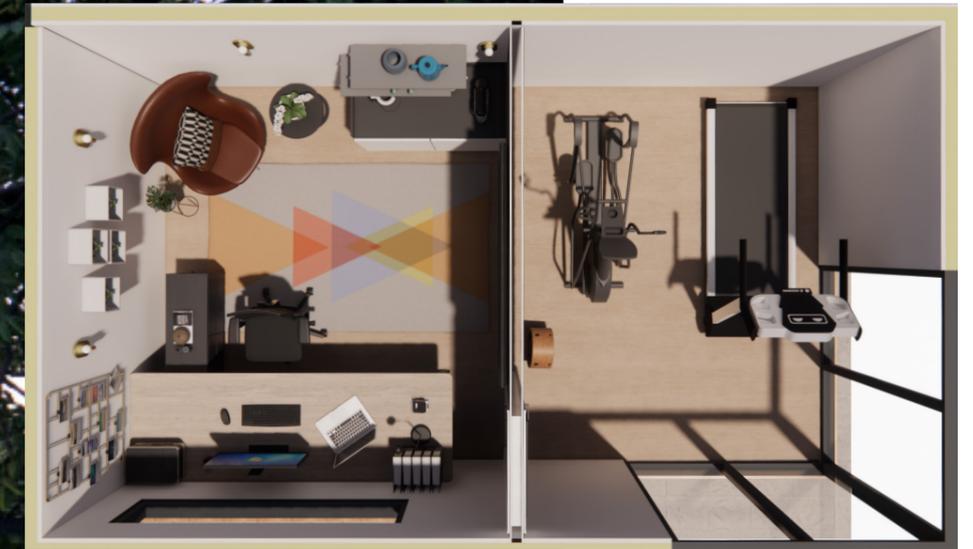

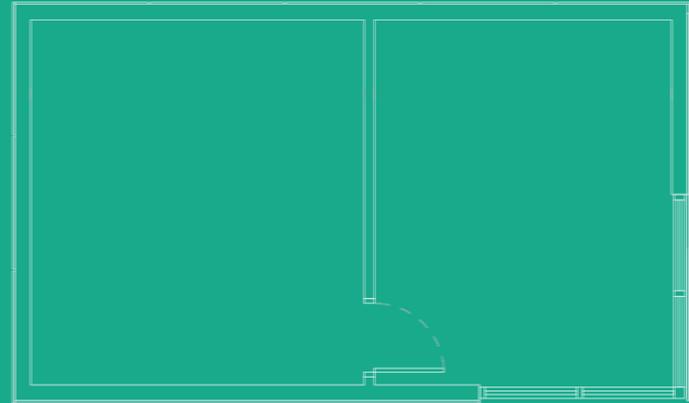

THE VOGUE

Option 02

The Vogue Garden House has been designed with an extra level of class. It features a glazed floating corner to flood the room with light.

The extended soffits with built in down lighting add dimension to the garden room.

A thin horizontal window allows for a selected view into the garden and encourages natural light into the far corner of the room.

THE AVANT GARDE

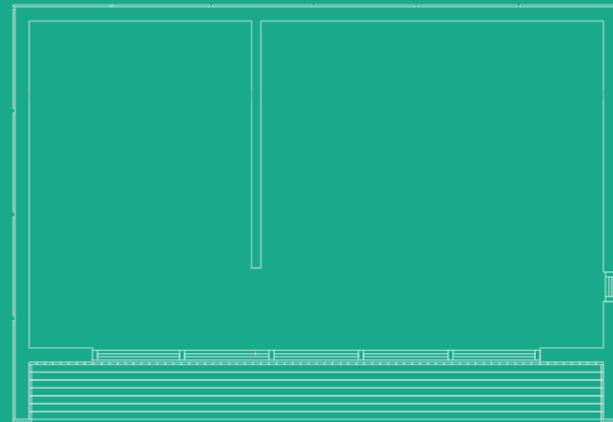

Option 03

The Avant Garde has been designed with a modern architectural edge; full height glazing, extended feature canopy and built in strip LED lighting to accentuate the boxed design.

Maximising the glazing across the front of the garden house allows for a more modern approach to living creating an open and adjustable space. Bringing the outside in to make the most of having a room in your garden.

The deep canopy creates shadows with slimline soffits along the sides of the building and a small inset to shield the glazing from weather.

This design creates a very open space for dynamic use. A moveable partition is a great addition.

VISUALISING YOUR SPACE

CASE STUDY

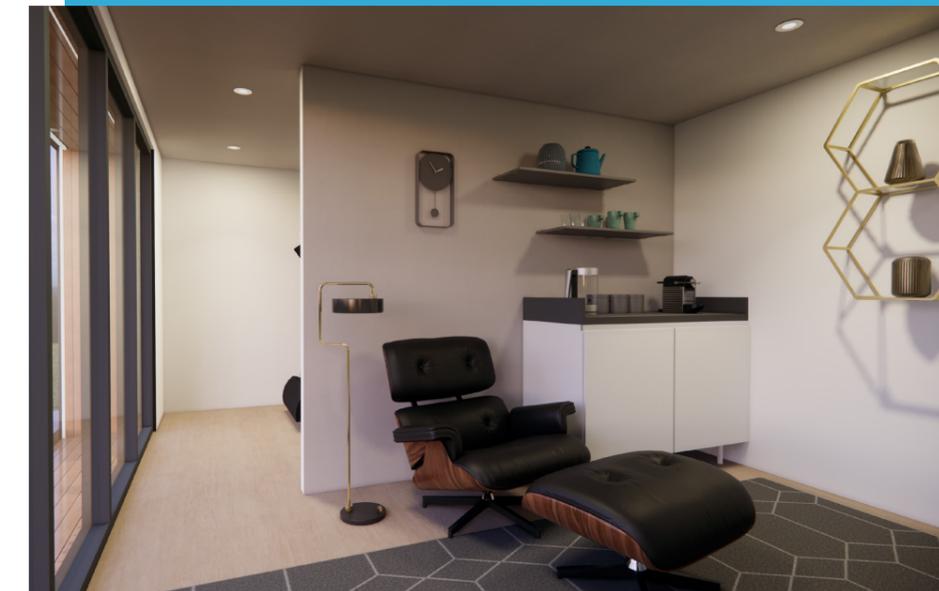

When you're working with such a small space and you want to make the most of your garden room but can't make a decision on how big to go or how wide to go, trying to work out which size best suits can get stressful.

Through our design service, we can place your furniture, move internal walls, give yourself the options until you've worked out exactly what size you need from us. We're more than happy to spend the time making sure you get what you need.

We can provide online consultations where we walk through your virtual room with you until you've got it exactly how you like.

The last thing we want is you spending money, only to find you needed that extra metre!

Our design team insist on using 3D throughout the process.

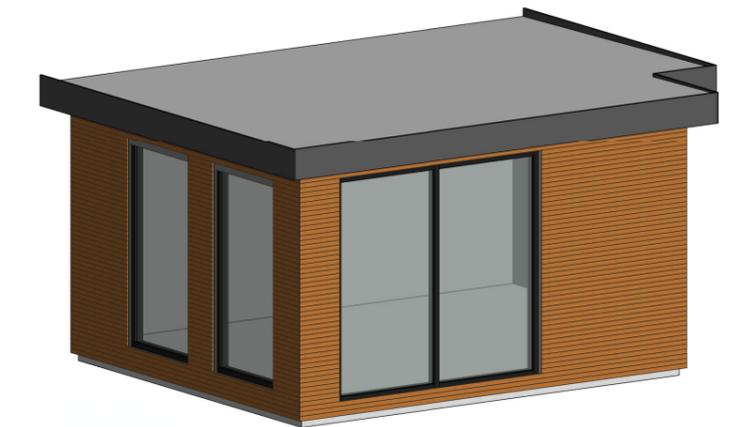

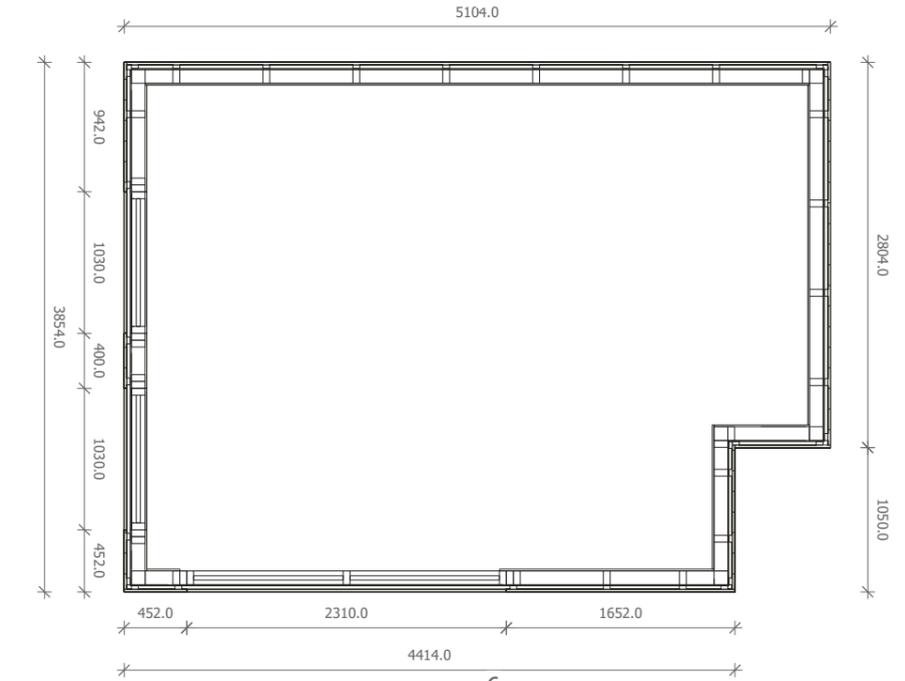

GO BESPOKE

CASE STUDY

Have a trickier space in your garden? Unlike most providers we offer you an option to go bespoke.

We appreciate not every garden has simple space in their garden ready to go. Therefore We can design a bespoke room that suits your garden, We'll do everything to make sure you are still able to achieve the space you want even if it is a little trickier.

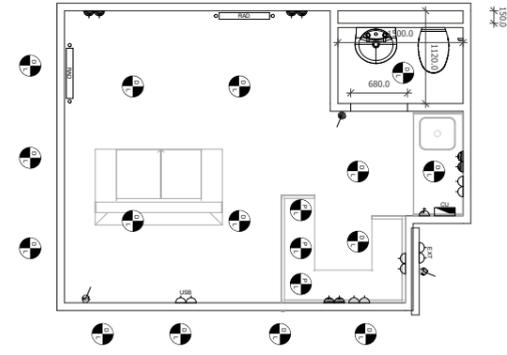

DESIGN

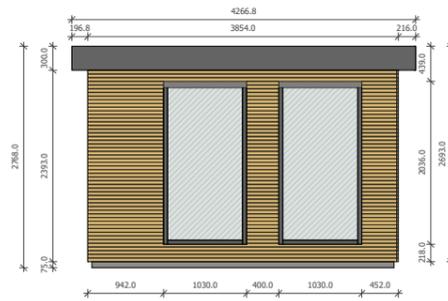

We went through a detailed design process, planning in every socket, spot lights, switches and ethernet points to make sure the room worked for the client.

This made the finishing process quick and simple.

EXTRAS

We didn't stop there. The client wanted us to fit all internal finishings, including providing interior design input into the soft furnishings and decoration.

Not only that, we built a custom bar using the Siberian Larch that cladded the external walls of their garden room. We hand made polished concrete worktops and fitted a green wall to really bring the feeling of a room in the garden.

One of the best things about our rooms are the highest quality materials from our suppliers. We have partnered with two independent businesses to ensure quality and consistency in every one of our builds.

George Hill provide all of our building materials, they source the best timber so if you are looking for a timber cladding you can be sure to have the best of the best.

Cheshire Bifolds supply all our windows and doors, they are leading suppliers in the north west and provide quality glass that keeps your room energy efficient and warm all year round.

We understand the importance of making sure your garden room is of high quality and lasting use so we make sure that is what you get.
